

For more information regarding BP Ultimate, BP Premium Unleaded or BP Unleaded please phone the **BP Lubricants and Eucls Technical** Helpline on 1300 139 700. You can also visit our website at www.bp.com.au

IMPORTANT NOTICE: This brochure reproduces information provided by the Australian Federal Chamber of Automotive Industries. BP does not make recommendations as to the suitability of any vehicle for a particular fuel and publication of this list is for information only. Vehicle owners should check with their car's manufacturer before using any product.

reference, please dispose of it thoughtfully.

fuel guide for older cars

Replacing Super for pre-1986 vehicles.

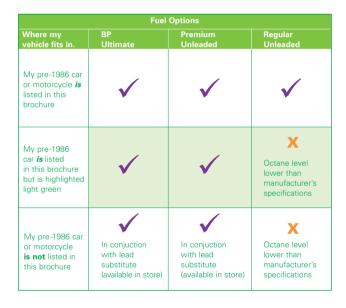

bb

Lead Replacement Petrol (LRP), also known as Super, has now been replaced by cleaner, more efficient BP fuels.

These are not only better for the environment, but contain more energy per litre, which means you'll fill up less often, and pay up less often.

To determine which BP fuel is best-suited to your car or motorbike, simply locate the make and model on the chart overleaf, then refer back to the table below. Note that some pre-1986 vehicles also require the addition of a lead substitute, such as Valvemaster,[®] at each re-fill.

If a lead substitute is required.

A lead substitute, like Valvemaster,® protects older engines by acting as a solid valve seat lubricant, in much the same way lead used to.

Valvemaster[®] is readily available, easy to use and comes in either 'single shot' packs for use with up to 20 litres of fuel, or in a 250ml re-sealable bottle. For full details. look for a Valvemaster[®] brochure in store

The original, and for some, still the best.

Many pre-1986 vehicles can use BP Unleaded fuel (see full list overleaf). It delivers good performance at a competitive price. Some older cars may require a higher octane level - make sure you check your own car model.

More power, less pollution.

BP Ultimate is Australia's cleanest unleaded petrol. With a 98 octane rating - the highest in Australia - it delivers maximum engine power, plus an advanced detergent to keep your engine running cleaner. And because BP Ultimate is a high energy fuel, you fill up less often and pay up less often.

BP Ultimate is also the only petrol certified Greenhouse Friendly by the Australian Greenhouse Office.

Great performance, great value.

Fast becoming the new standard in automotive fuel, BP Premium Unleaded offers 95 octane performance. active detergents to help your engine stay cleaner, and a competitive price.

Volvo

Make Toyota

Use only a high-octane fuel such as BP Ultimate or Premium Unleaded. Regular Unleaded is not suitable, as the octane level is generally lower than the manufacturer's specifications.

If you own a pre-1986 car or motorcycle NOT listed here, use a lead substitute such as Valvemaster.®
