

NEW DATSUN 120Y

We took what had been Australia's most popular light car, added even more built-in extras, gave it a huge new interior, then created the most stunning new body style.

NEW DATSUN 120Y

The new Datsun 120Y puts together every desirable ingredient to create the ultimate 4-door light sedan. Just read of all the features, built-in extras, performance, luxury and safety, and you'll agree it's the perfect put-together.

Y it has more built-in extras!

With the addition of disc brakes and lay-back seats the Datsun 120Y gives you more of the extras

the others try to sell you. Plus, a solid-state push-button radio; heater/demister with 2-speed fan; electric clock; flow-through ventilation; colour-keyed carpets; reversing lights, cigarette lighter; 2-speed wipers with locking switch; electric windscreen washers; parcel tray; lockable petrol cap; full wheel covers; centre console box; head restraints.

Y it is more powerful!

Under the bonnet of the Datsun 120Y is the famed 5-bearing crankshaft, 1200 cc engine — proved in races and rallies all over the world. So well designed is this engine that it has continually beaten cars of larger capacity.

Y it looks great!

The long, low look that leaps right out at you. The result of the combination of wind tunnel tests and the world's top designers. From the daring grill to the concave wheel covers, from the accented body sides to the swept-up rear, the look that's been created is all "go".

Y it has more luxury!

Luxury not just to be looked at, but luxury to ensure your comfort in every possible way. There's plenty of room for the longest Australian legs. The fully adjustable bucket seats are completely contoured and thick with foam padding.
