

**For those who don't
like to hang back,
Holden brings
forward a mean
new Monaro.**

Varoom!

A push in the back that changes your ideas about acceleration. It comes from the GTS '350'. In two fiery versions; 300 hp for track-men in a 4-on-the-floor manual; or 275 hp for road-men in a T-bar automatic. This is the car that rewrote the record book. The formula's no secret. Holden's 350 cu. in. V8. Monaro' wind-cheating body. Tuned suspension, limited slip differential, flat ride, predictable handling, clean, safe cornering, better than anything in its class. Super thick front discs and balanced power assistance control high performance D70 nylon redband tyres on wide rally wheels. Outside, there's a lean new look. Long and mean with new sidewinder stripes and fiery colours . . . it says this car's for driving. Come fire one up. Your Holden Dealer's more warm-hearted than you thought.

**HOLDEN'S
great balls
of fire**
